

Rajasekhar Reddy Kolagotla

Java Full Stack Developer

(916) 399-3684 | rajasekharrkolagotla@gmail.com | [LinkedIn](#) | Newark, CA

Professional Summary

Results-driven Java Full Stack Developer with **5+ years** of experience in designing, developing and deploying scalable web applications and microservices using **Java, Spring Boot, React, Angular & Node.js**. Proven expertise in building cloud-native applications using **AWS** and **Azure**, containerized with **Docker** and orchestrated using **Kubernetes**. Skilled in front-end technologies (**HTML5, CSS3, Bootstrap, JavaScript, TypeScript**) & backend integrations involving **REST APIs, Apache Kafka** & various SQL/NoSQL databases including **PostgreSQL, MongoDB, MySQL & Cassandra**. Hands-on experience with **CI/CD pipelines** using **Jenkins, GitHub, Bitbucket, Maven, Gradle** & infrastructure automation using **Terraform**.

Technical Skills

- **Programming Languages:** Java, JavaScript, Python, TypeScript, Bash, Shell, C#, C++, Groovy
- **Backend & Frameworks:** Spring Boot, Spring MVC, Spring Batch, Spring Cloud, Spring Security, Spring IOC, Hibernate
- **Frontend Technologies:** HTML5, CSS3, Bootstrap, Django, Flask, Redux, ReactJS, AngularJS, NodeJS, AJAX
- **AI/ML & Data Tools:** AWS SageMaker, TensorFlow (basic), Machine Learning APIs, NLP-based Chatbots, AI-driven Fraud Detection, Sentiment Analysis, Data Pipelines (Kafka, Spark)
- **Cloud Platforms:** (AWS EC2, S3, Lambda, EKS, ECS, Cloud Foundry), Microsoft Azure, Google Cloud Platform (GCP)
- **DevOps & CI/CD Tools:** Jenkins, Git, GitHub, Bitbucket, Maven, Gradle, Terraform, CI/CD Pipelines, Code Review
- **Messaging & Event Streaming:** Apache Kafka, Spring Kafka API, RabbitMQ, Apache ActiveMQ
- **Databases:** MySQL, MongoDB, PostgreSQL, SQL Server, DynamoDB, H2, NoSQL, Cassandra, Hadoop
- **Containerization & Orchestration:** Docker, Kubernetes
- **Monitoring & Logging:** Amazon CloudWatch, Splunk, New Relic, log4j
- **Testing & Documentation:** JUnit, Mockito, Postman, Swagger, SonarQube
- **Project & Agile Tools:** Agile (Scrum), Jira, Confluence, Atlassian
- **Operating Systems:** Linux, UNIX, Windows

Work Experience

Java Full Stack Developer

Feb. 2024 – Present

Wells Fargo | San Francisco, CA

- Developed and deployed scalable **Spring Boot microservices** to handle real-time ACH, wire and peer-to-peer payment transactions using **Kafka** and **PostgreSQL**, improving transaction throughput by **35%**.
- Integrated frontend with backend APIs using **AJAX** and secure JWT-based authentication, while coordinating error-handling mechanisms through **Swagger API docs** and **Postman** testing.
- Leveraged **Docker** and **Kubernetes** for microservice deployment across AWS environments (EKS, ECS), with infrastructure provisioning automated through **Terraform**.
- Followed Agile/Scrum methodologies and conducted **unit testing (JUnit/Mockito)**, code quality enforcement via **SonarQube** and CI/CD pipeline management using **Jenkins, Git, Bitbucket** and **Maven**.
- Designed and implemented full-stack applications using **Java, Spring Boot, Spring MVC** and **REST APIs**, with frontend development in **React, Redux** and **TypeScript** for responsive, dynamic UIs.
- Built rich UI dashboards using **Angular, HTML5, Bootstrap** and **RxJS** for real-time transaction monitoring, fraud detection and operational alerts, enhancing user response time by **40%**.
- Applied **Node.js, Python** and **Bash/Shell scripting** for backend scripting, automation tasks and integrations with external APIs and AWS services such as **DynamoDB, S3** and **Lambda**.
- Managed databases including **MongoDB, MySQL, Cassandra, PostgreSQL** and **NoSQL** for persistence, data modeling and complex query optimization in distributed systems.
- Deployed cloud-native applications on **AWS** using **EC2, EKS, CloudFormation** and **Terraform**, enabling **50% faster** infrastructure provisioning and reducing manual deployment errors.
- Utilized **GitHub, Bitbucket, Jenkins, Gradle, Maven** and **CI/CD pipelines** for continuous integration and delivery, with robust monitoring and logging implemented on **Linux/UNIX** environments.

Environment: Java (Spring Boot), Angular, HTML5, CSS3, Bootstrap, JavaScript, MySQL, SQL Server, RESTful services, JIRA, MVC architecture, AJAX, AWS ECS, AWS S3, AWS RDS, AWS CloudWatch.

Java Full Stack Developer
TCS | India

Jan. 2019 – May 2022

- Developed **Spring Boot-based microservices** for customer onboarding, KYC validation and loan eligibility modules, integrating with a centralized **MySQL** database and internal APIs, resulting in a **30% reduction in processing time**.
- Designed front-end interfaces using **React, Redux, Bootstrap** and **JavaScript** to deliver responsive customer portals for account access, credit card application and e-statement views.
- Consumed third-party APIs using **AJAX** and implemented secure REST APIs for internal service communication, leveraging **Swagger** documentation and **Postman** for testing.
- Built message-driven components using **Apache Kafka** for processing background tasks like e-mail alerts, statement generation and fraud monitoring, **boosting system reliability by 45%**.
- Deployed microservices to **Azure App Services** and containerized applications using **Docker and Kubernetes**, while automating infrastructure provisioning using **Terraform**.
- Created and deployed **Java full-stack applications** using **Spring Boot, Spring MVC, RESTful APIs** and front-end development with **Angular, React, TypeScript** and **Redux**.
- Used **Microsoft Azure** services including **App Services, Azure DevOps, Blob Storage** and **Azure SQL Database** for cloud deployment, CI/CD automation and monitoring.
- Managed database systems like **MongoDB, SQL Server, PostgreSQL** and **NoSQL (Cassandra)** to support complex queries and high-availability requirements.
- Implemented CI/CD pipelines using **Jenkins, Azure DevOps, Maven** and **Git**, integrating code quality checks using **SonarQube**, which reduced deployment failures by **60%**.
- Built reusable UI components with **HTML5, CSS3, Bootstrap, AJAX** and **JavaScript**, following Agile Scrum methodology for delivering iterative, business-aligned features.

Environment: Java, Python, TypeScript, JavaScript, Bash, Shell, Spring Boot, React, Redux, React Hooks, Angular, Node.js, HTML5, CSS3, Bootstrap, AJAX, PostgreSQL, Azure App Services, Azure Kubernetes Service (AKS), Docker, Kubernetes.

Education:

Master's in Computer Science - California State University, Sacramento, CA, USA.

Bachelor's in Computer Science - KL University, India.

Personal Projects:

Securing Cloud Data with AES & Honey Encryption (React.js, Django, SQLite, AWS, Python):

[GitHub](#)

- Designed and implemented a scalable dual-layer encryption system integrating AES and Honey Encryption, enhancing cloud data confidentiality and resistance to cyber threats.
- Deployed the model on AWS using NGINX for adaptability across cloud environments and conducted empirical testing, demonstrating a 15% improvement in security metrics compared to traditional AES encryption.

RAG Agent for Drone AI Analytics (Gradio, LLM's, FASTAPI, Vector Store, LangChain):

[GitHub](#)

- Developed and Deployed a Retrieval-Augmented Generation (RAG) chatbot to support real-time drone data querying using LangChain, FastAPI, and NVIDIA's embedding models.
 - Integrated vector search to retrieve telemetry logs and provide contextual LLM-based answers for flight analytics, anomaly detection, and mission insights.
-

Certifications:

- **AWS Certified Solutions Architect - Associate**
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate**
- **Google Prompting Essentials**
- **Tableau & Power BI**
- **Building RAG Agents with LLMs (Nvidia)**
