EXPERIENCE

Full Stack Software Developer (Part-time)

Sep. 2022 – Dec. 2024

Skeyee Dynamics

Hyderabad, India

- Developed and maintained **full-stack** web applications using **React.js**, **Node.js**, and **Python/Django**, supporting real-time drone operations and reducing incident response time by **40%**.
- Engineered **RESTful APIs** and **ETL** pipelines to manage telemetry and sensor data from drones, integrating **AI/ML models** for flight analytics, anomaly detection, and predictive maintenance, which decreased system failures by **25%**.
- Built **5+ interactive data dashboards** visualizing drone health and flight metrics, increasing operational visibility for clients by **60%**.
- Collaborated using **Agile/Scrum** with a team of **6 developers**; led **code reviews** that reduced bugs in production by **30%**.

Software Engineer Intern (Internship)

May 2024 – Aug. 2024

UL Solutions

Fremont, CA

- Automated** wireless performance testing using **Python scripts**, improving **test coverage** by **30%**, reducing manual inefficiencies, and ensuring consistency across various devices and platforms.
- Executed and optimized **50+ test cases** using UL EMC and RF tools; documented **100+ bugs** in **Jira** with reproducible steps, improving bug resolution turnaround by **35%**.
- Delivered Python-based **automation scripts** and **QA reports** that contributed to **100% UAT pass rate** and on-time project delivery.

Full Stack Developer (Full-time)

Jan. 2019 – May 2022

Tata Consultancy Services Pvt. Ltd.

Kolkata, India

- Promoted **twice within 3.5 years** for outstanding performance and leadership in **project delivery** and **client satisfaction**.
- Led a cross-functional team of **6 developers**, overseeing design, development, and deployment of **microservices** using Spring Boot, REST APIs, and Apache Kafka, improving customer onboarding speed by **30%**.
- Mentored **4 new joiners**, providing onboarding, technical training, and code review guidance—accelerating their ramp-up time by **50%**.
- Developed **responsive front-end interfaces** with React, Redux, Angular, and Bootstrap, reducing UI defects by **40%** and improving load times by **45%**.
- Used Swagger and Postman to test and document **80+ REST APIs**; ensured **99.8% system uptime** and seamless backend/frontend integration.
- Containerized and deployed apps to Azure App Services using Docker, Kubernetes, and Terraform; built CI/CD pipelines with Jenkins and Azure DevOps that reduced release cycle time by **50%** and deployment failures by **60%**.

EDUCATION

California State University, Sacramento, CA

Dec. 2024

Master of Science in Computer Science | 3.63 GPA

Coursework: Advanced Database System Design, **Advanced Algorithms Design and Analysis**, Data Analytics and Mining

K L University

June 2018

Bachelor of Science in Computer Science | GPA: 3.3

Coursework: **Data Structures**, Operating Systems, Object-Oriented Programming, Database Management System, Computer Systems Structure

TECHNICAL SKILLS

- Languages:** Python, Java, C, SQL, PL/SQL, JavaScript, TypeScript
- Databases:** SQL (Microsoft SQL Server, PostgreSQL, MySQL, SQLite, Oracle), NOSQL(MongoDB)
- Frameworks & Tools:** React, Angular, Bootstrap, Node.js, Express.js, REST API, Flask, Spring Boot, Git, JIRA, Postman, Swagger
- Cloud & DevOps:** AWS, Azure, Docker, Terraform, GitHub Actions
- Machine Learning:** TensorFlow, NumPy, Pandas, Matplotlib, Algorithms (Regression, Classification, Clustering)
- Data Analytics & Reporting:** Tableau, Power BI, Oracle Reports, Oracle Forms Developer, XML/BI Publisher
- Soft Skills** – Agile, Leadership, Critical Thinking, Team Management, Communication

CERTIFICATIONS

AWS Certified Solutions Architect - Associate, Data Visualization, Tableau, Power BI

PROJECTS

Securing Cloud Data with AES & Honey Encryption (React.js, Django, SQLite, AWS, Python):

[Github](#)

Designed and implemented a scalable **dual-layer encryption system** integrating **AES and Honey Encryption**, enhancing cloud data confidentiality and resistance to **cyber threats**. Deployed the model on **AWS** for adaptability across cloud environments and conducted empirical testing, demonstrating a **15% improvement** in security metrics compared to traditional AES encryption.

E-commerce Application Development (Oracle APEX, Oracle Autonomous DB, SQL, PL/SQL, OCI, ORDS):

[Github](#)

Designed and developed a scalable **eCommerce application** using **Oracle APEX** and **Oracle Autonomous Database**, ensuring high availability, security, and performance. Implemented key functionalities such as user authentication, product catalog management, shopping cart, and order processing. **Optimized SQL queries** and **PL/SQL procedures** to enhance database efficiency. Leveraged Oracle Autonomous DB for automated performance tuning and security, enabling seamless deployment and scalability.
